WHAT IS GOODEATS?

- Cross Platform mobile app for foodies who want to share their love of food with friends

OUR VISION

Create a platform for foodies to connect and share their dining experiences

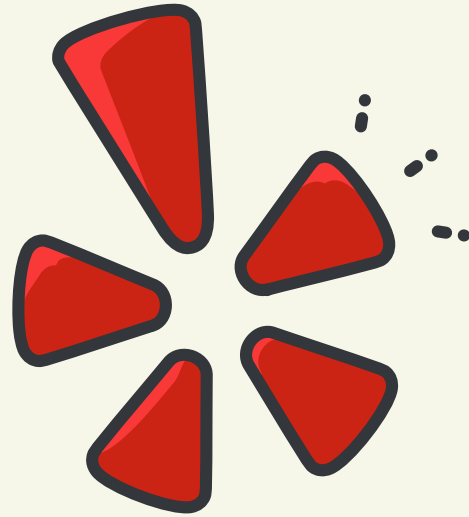

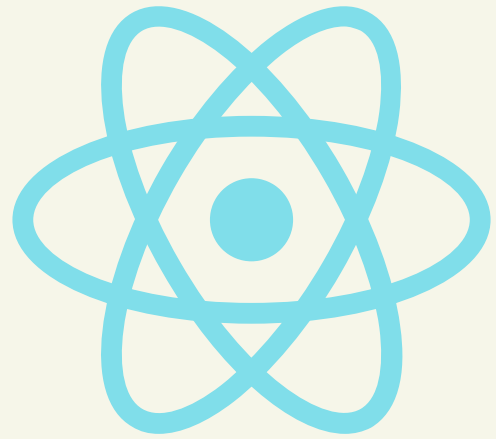

Provide a database of restaurants for users to discover new places to eat.

Facilitates easy planning for a foodies next culinary adventure

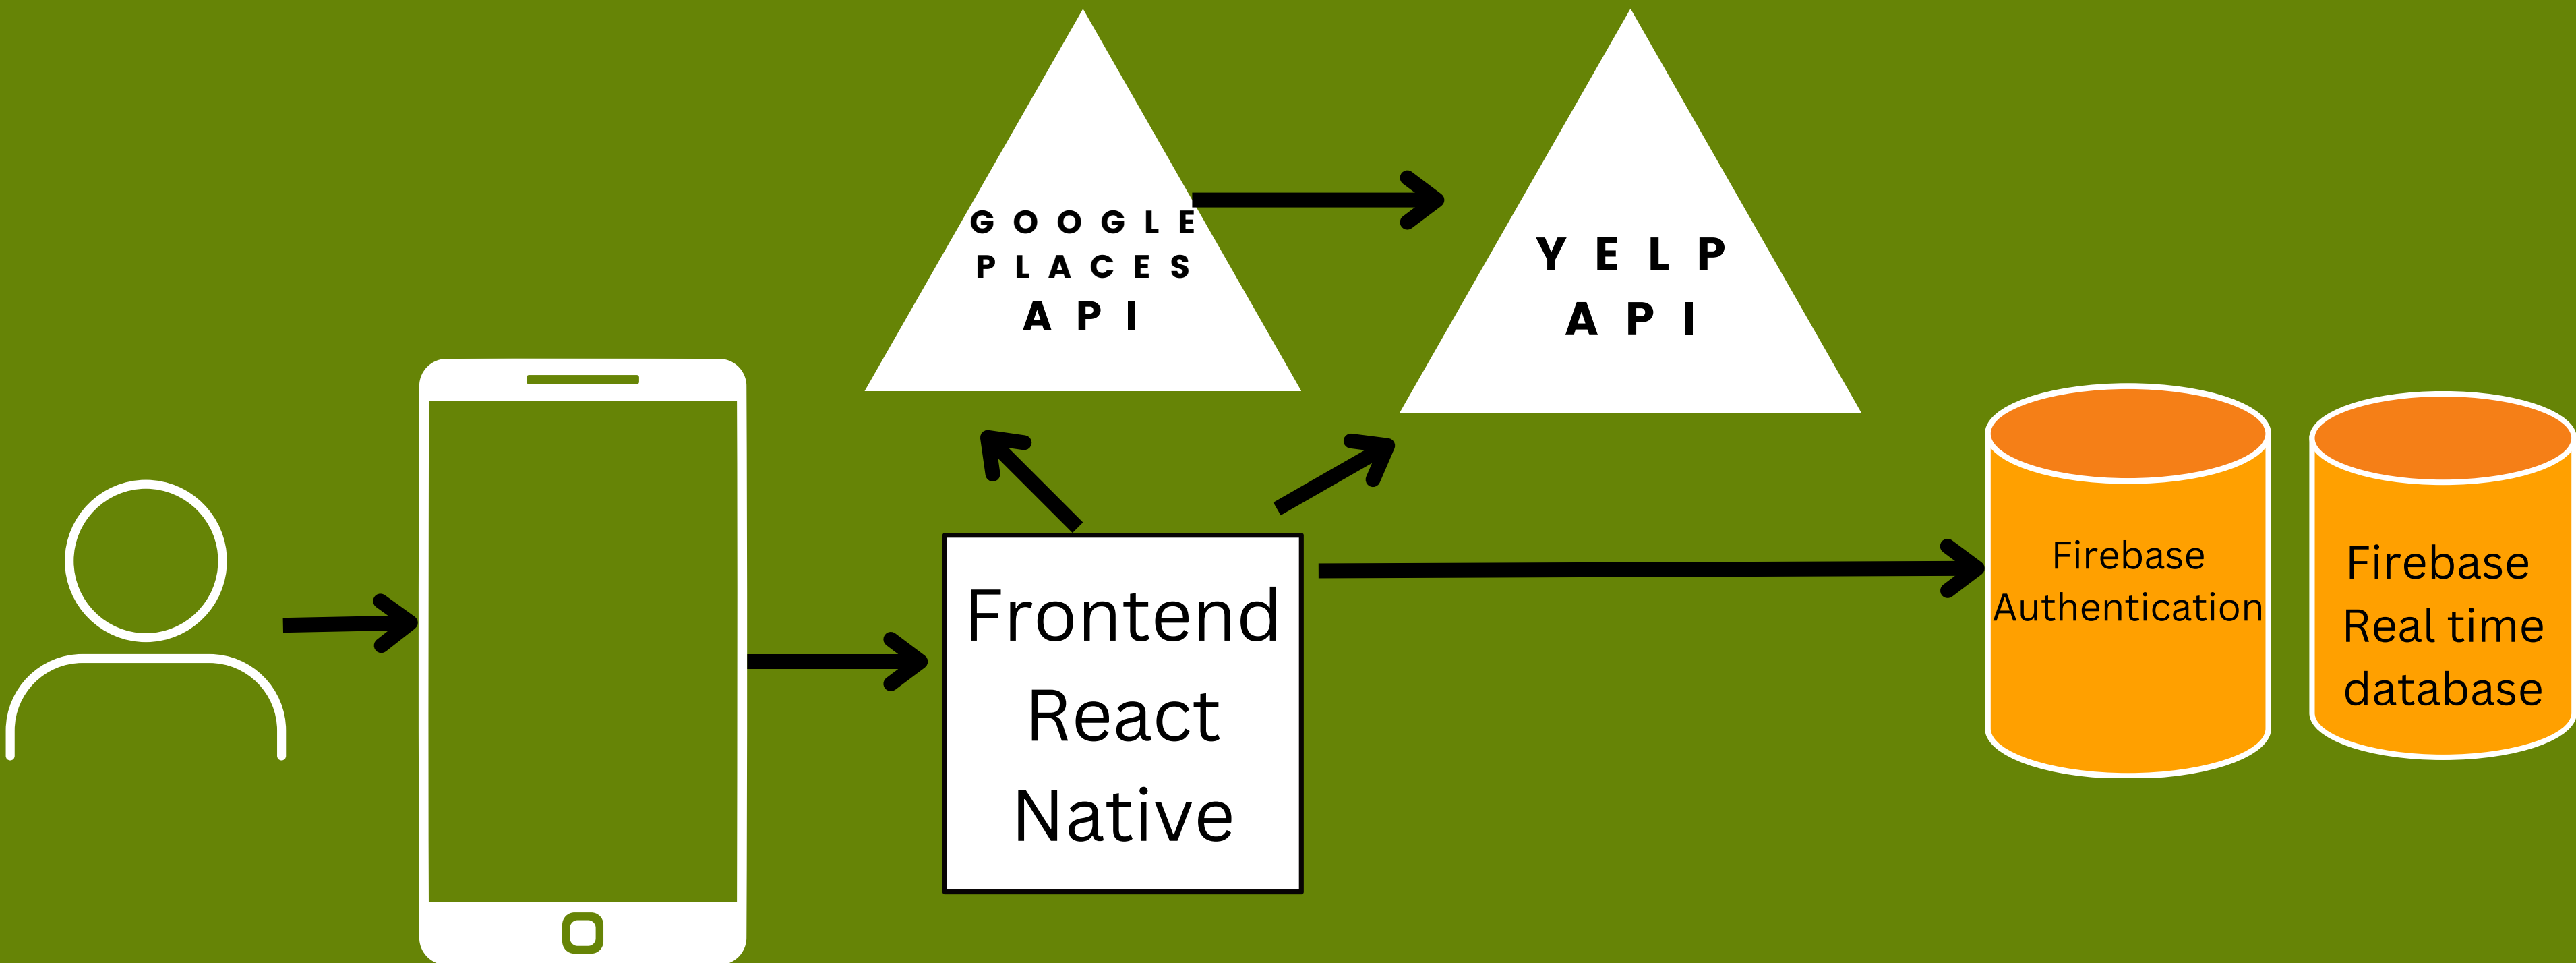

HOW WE'LL DO IT

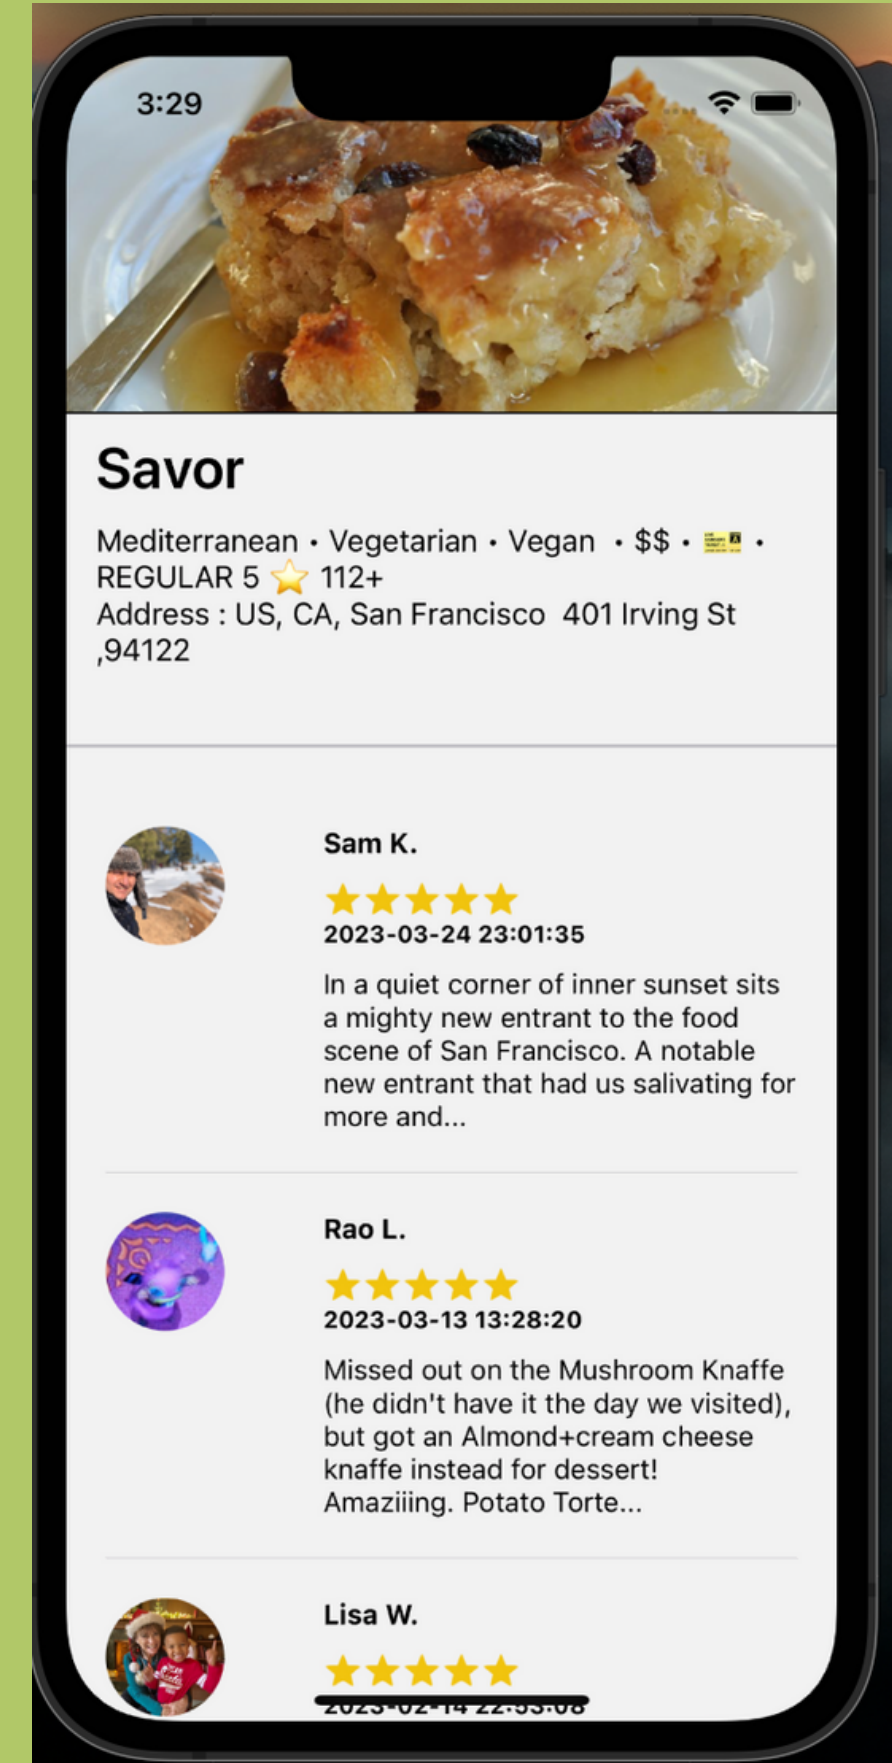

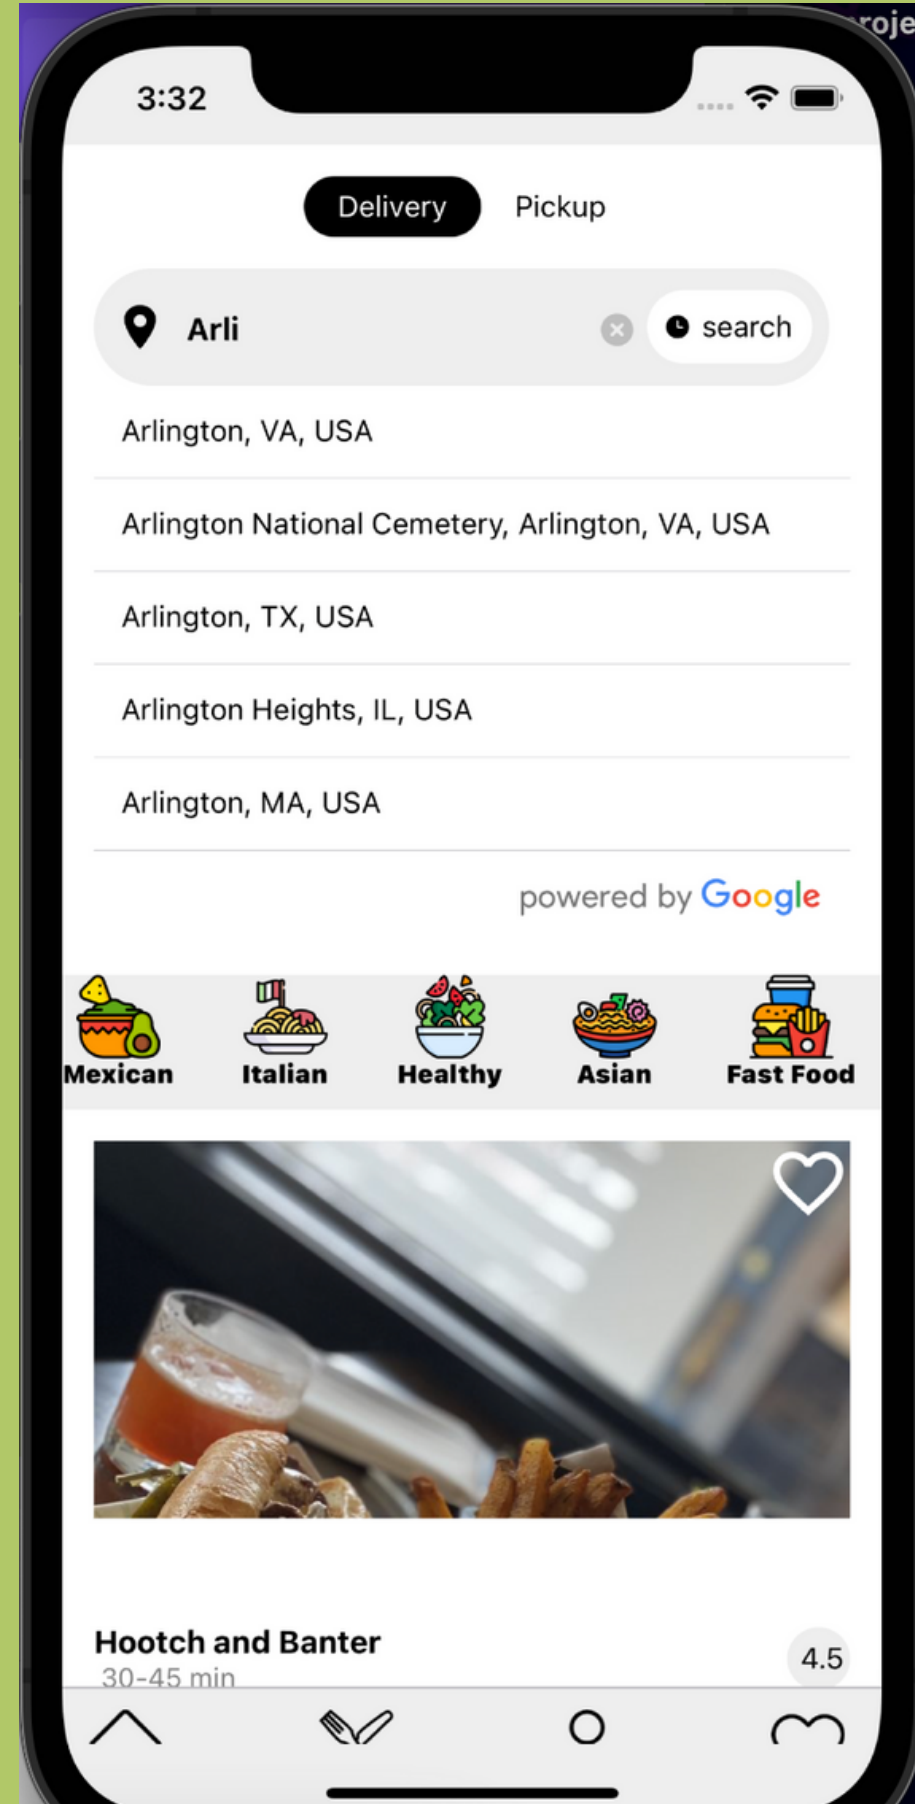

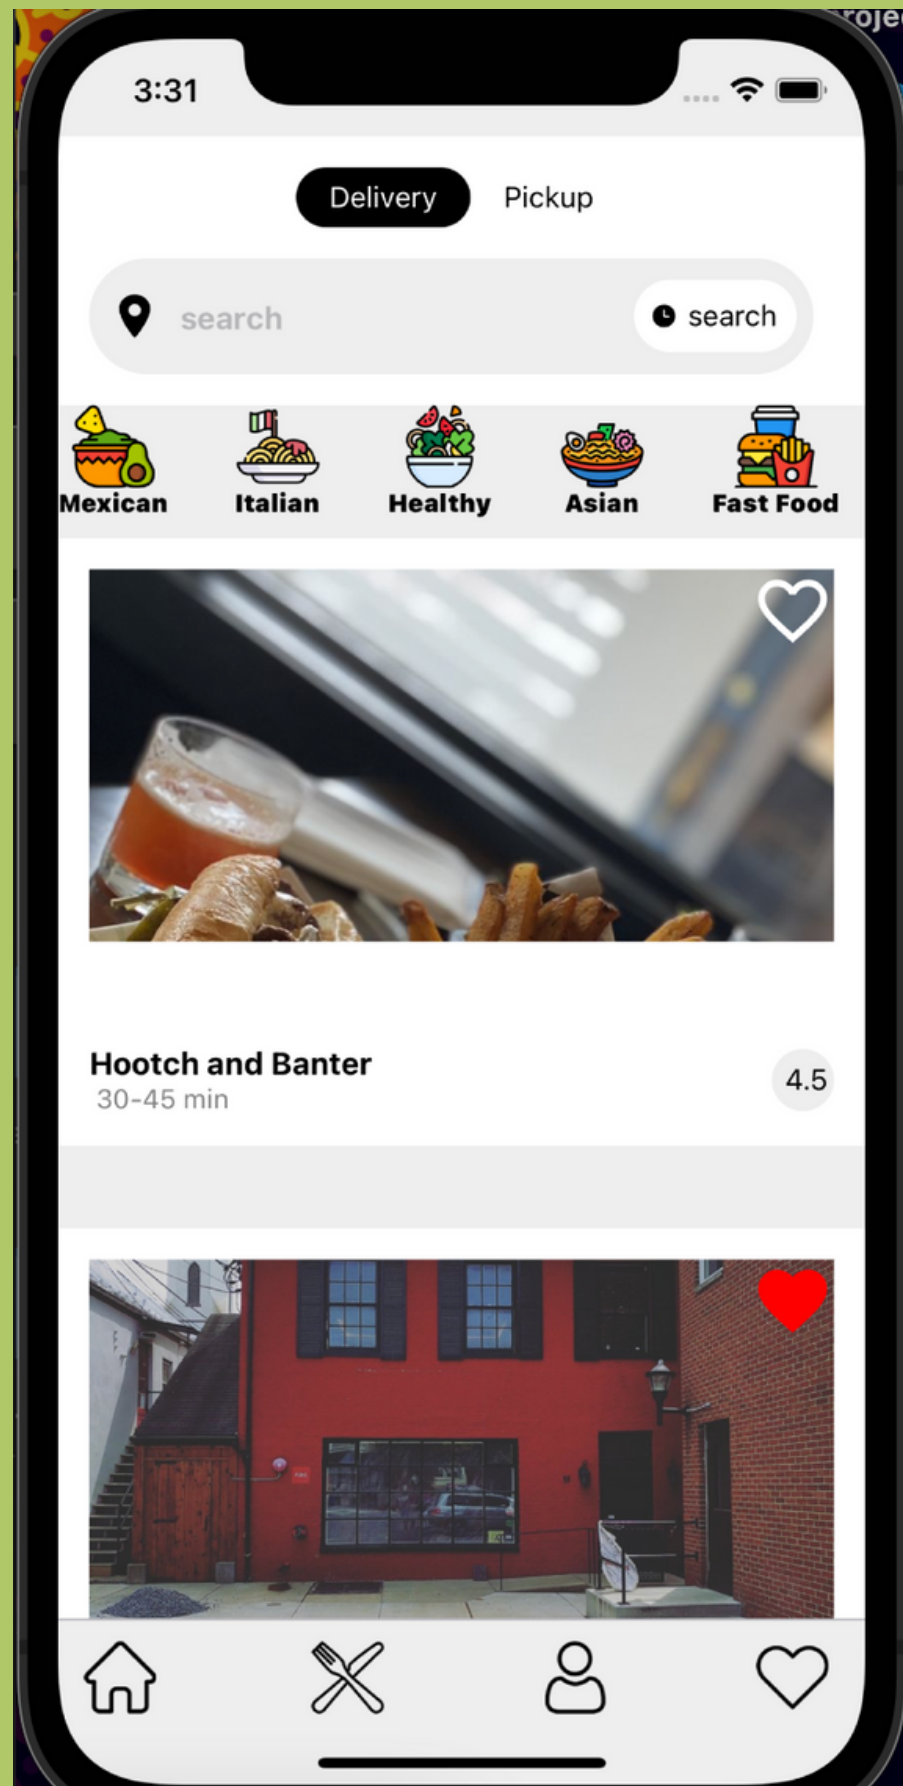

*Mobile apps have two parts:

- Frontend: the app that users interact with.
- Backend: the code for interacting with the database, sending and receiving data to and from the app

Features

Demo

TEAM DYNAMIC

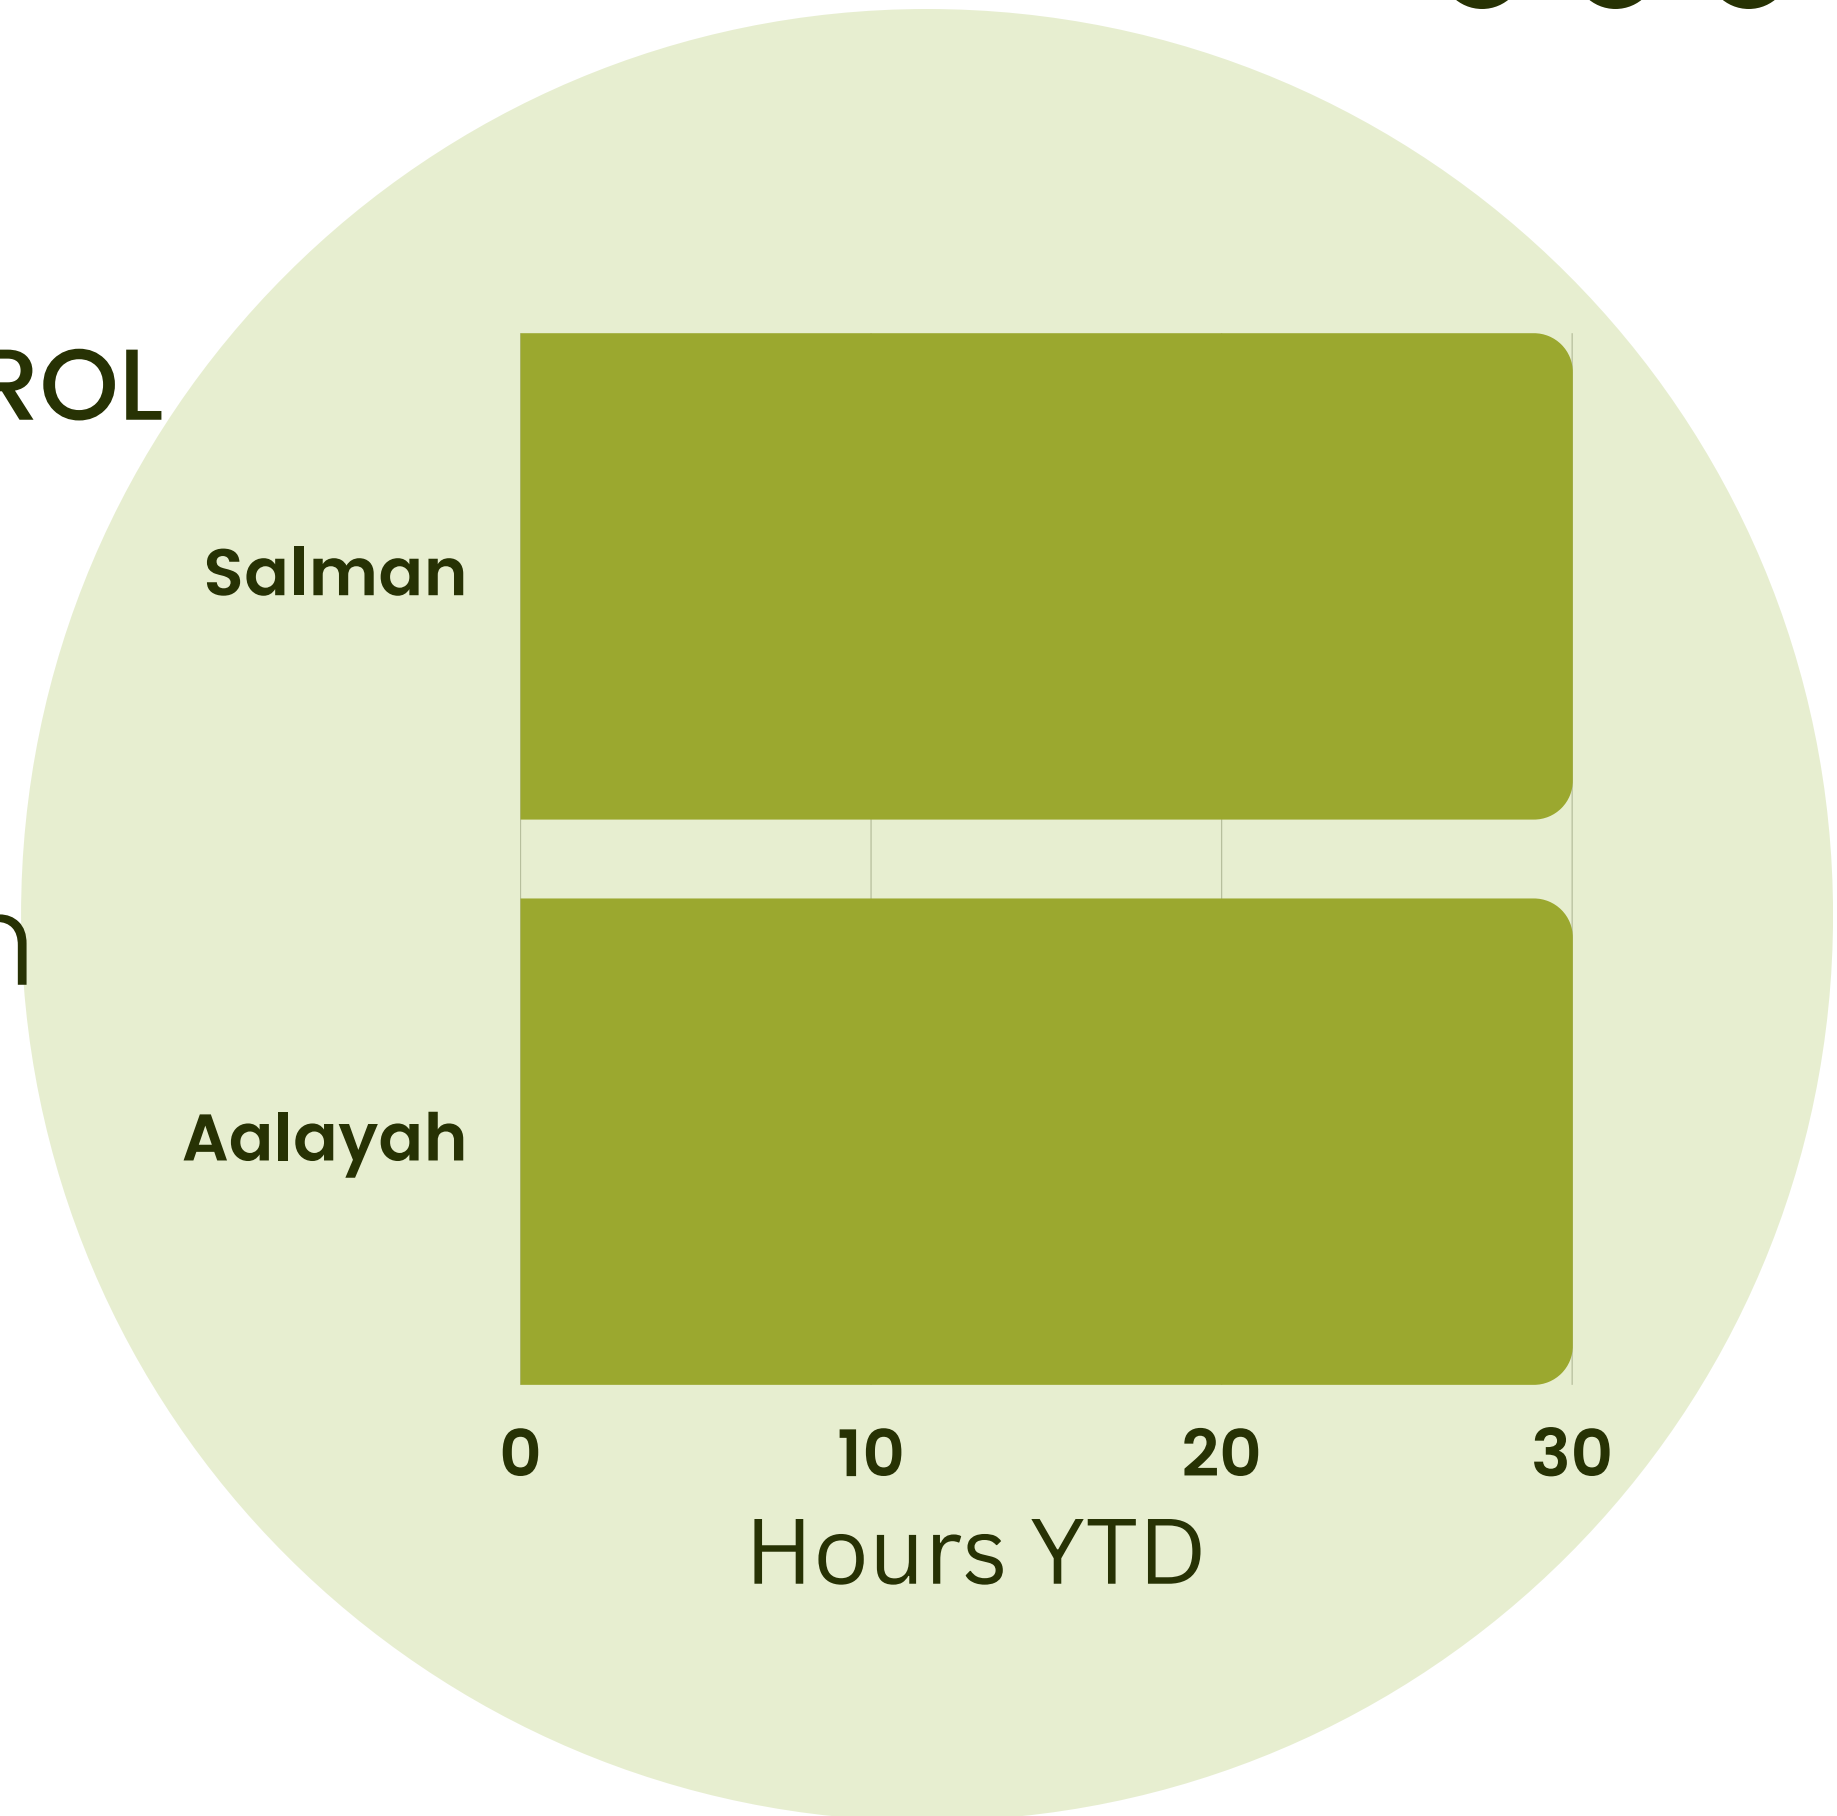

AGILE • TRELLO • VERSION CONTROL

Aalayah:

- Categories feature
- Restaurant Information

Salman:

- React Navigation
- Restaurant Reviews

R O S E

- Components and structure of app
- Show categories and restaurants using the Yelp API and Google Places API respectively.

B U D

- Implementing a login system to enhance the personalization of the app
- UI/UX has a lot of room for growth

T H O R N

- Version control caused some setbacks and delays in the development process.
- Not solidifying design sooner

```
> assets
✓ components / home
  > LoginScreen
  > restaurantsDetail
  > SignupScreen
  JS BottomTabs.js
  JS Categories.js
  JS HeaderTabs.js
```

NEXT STEPS

Enable ability to create account, sign In, and add friends

Write a review for restaurants

Save a restaurant and view it later

Ability to access users camera to display 3D object of menu item

@reallygreatsite

THANK YOU!
